# QUICK COUPLER SE SERIES

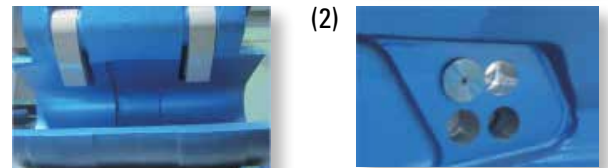

# QUICK COUPLER SE SERIES

## Features of the Aiyon Coupler

- (1) Special steel casting integrated structure.
- (2) Safety is ensured through adopting a double lock autolock mechanism and mechanical lock mechanism unique to our company.
- (3) The structure is such that when the attachment is installed and the bucket pins are caught by the main body it is not necessary to check the position of the operating arm.
- (4) A relief valve attached to the hydraulic cylinder can handle unexpected excess impacts.
- (5) Greasing is not necessary thanks to the use of non-lubrication bushings with the bearing of each pin.
- (6) A wide range of installation configurations are available, from buckets to attachments.

## SPECIFICATIONS

		SE350	SE450	SE850
